Hi Reiner,

Your Lafranconi replica has been doing great. I like your product. It sounds really deep and the manufacturing accuracy is good. I had no problem in fitting them on my Stone 2003.

There's one thing I wonder. Why do you account that they suit only 1100i and EV? I think they match with almost all 1100 series before injection and even some of 850 series can fit if they get suitable mount plates.

Thanks,  
Yasutoshi

Hi Reiner,

I got them this evening! It took less than 2 weeks, right? Thanks, your packing is great. Oh yes, I paid an extra tax of 10100 yen here. hmmm, the governer has the best deal...

Thanks, I will try to put them on my Stone this weekend.

Yasutoshi
